

See how much you can save!

Save up to £1,110 on home insulation

If your loft and walls are not adequately insulated you could be losing over half the heat from your home.

Through our home insulation scheme you can receive a discount off the cost of loft and cavity wall insulation and cut the cost of your energy bills by up to £200[#] a year.

Energy saving measure	Main heating fuel	Typical price up to	You save up to	YOU PAY after our discount

Hot Water Tank** Insulation:	N/A	£20	£10	£10

All boarded walkways in lofts are charged extra. Prices shown are available for insulating typical homes with up to 4 bedrooms. #Cavity wall insulation prices shown are available for wall areas up to 42m² for top floor flats, 52m² for 2/3 bed mid terrace, 95m² for 2/3 bed semi detached or end terrace houses, 70m² for semi detached bungalows, 115m² for 2/3 bed detached houses and 140m² for 4 bed detached houses. Extra charges will be made to cover additional areas. *Loft prices are based on insulating a loft with no insulation – higher prices will apply to top-up existing loft insulation. Loft Insulation prices are based on loft areas up to a maximum of 52m² for top floor flats, 51m² for 2/3 bed mid terraced, semi detached or end terraced houses, 65m² for 2/3 bed semi detached bungalows, and 80m² for 2/5 bed detached houses. Extra charges will be made to cover additional areas. **Hot water cylinder jacket only available if installed at same time as loft or cavity wall insulation. # Energy savings based on insulating a home with no current insulation. Offer is subject to site survey and available up to 31st March 2004.

Grants

Householders receiving income related benefits or on low incomes may qualify for further help, for further information please call: 01865 252197

Big Green Boiler Scheme

With the discounts available through the Big Green Boiler Scheme, you can now buy a high efficiency condensing boiler for a similar price to a conventional boiler. Condensing boilers are generally 12% more efficient than modern conventional boilers. So, during the 15 year life span of a boiler, you can expect to save around £900 more on your gas bills with condensing technology (at current prices).
